

Bob Dippel
IPM Sales & Service Specialist

History with Wil-Kil:
Bob joined Wil-Kil in 2016

Approach to Pest Control: My approach to pest control is to start by investigating the situation and understanding what pest I am working with, their entry points into the structure and any conditions in the environment that are contributing to the issue. I want to find a lasting solution, not a temporary band-aid, so I will work with my clients to make sure that happens.

Pest Control Certifications:
7.1 Structural Pest Control
